

Har-Vest™ Fitting Instructions

Chest/O-Ring Strap

Affix Chest strap to side O-rings of Har-Vest. Place over dog's head onto back.

Girth Strap

Attach one side of girth strap to a side O-ring, bring under dog's belly behind legs and clip to other o-ring.

Elastic Belly Band

Snap one end of belly band to vest, bring under belly of dog and snap to most appropriate snap for your dog's torso.

Attach leash to center o-ring for no-pull control.

Adjust all straps for a proper fit (elastic belly strap does not need to be snug). Most dogs have NO adjustment period but all dogs may vary. Your dog should have full range of movement and you may see a wonderfully calming benefit.

NOTE:
While Har-Vest is designed to add control of your dog for on-leash behavior, it is NOT a substitute or replacement for training.

Har-Vest comes with a money back guarantee (less shipping) if returned in sale condition and within 30 days of purchase price.
